

So you are off road and your truck brakes, no problem you have your cell phone, just call for help? You flip open the phone and the battery indicator says one bar, not enough to power the phone to call across the trail let alone a buddy to come and tow you out. Time to start hiking out, unless you have a Powerstick from Ecosol. Got one? Then you just plug it into your cell for enough extra power to call for rescue. Also provided are power adapters for most popular cameras as well as most popular cell phones. Powers up in any USB port, and you are ready for any power emergency.

PU-PRODUCTS has created a kit for those little emergencies on the trail that threaten to strand you. They have packaged everything in a ballistic nylon case that is small enough to stash in any handy spot and the Velcro straps on the back enable you to attach it to your roll cage. The kit includes; jumper cables, a Super Siphon, tow strap, basic first aid kit, electrical tape, 'zip' ties a razor blade a glow stick and for signalling a whistle and a stainless steel mirror. Also included is a Rok tie down. www.pu-products.com

THE LightForce 240 HID delivers unmatched performance. Using xenon gas discharge HID technology, it results in up to three times more light than the biggest 12V halogen bulb. Best of all it does this in an efficient manner, drawing approximately 3 amps, the equivalent of a 35W bulb.

THE entire unit weight close to half of that of its competitors, and it's waterproof. Unlike many other HIDs, the LightForce 240 HID has no remote ballast, with the ballast being built into the light itself for better protection and easy installation.

Rok tie downs are quite extensive and obviously well thought out. the stretchy core is 100% rubber with a polyester cover, and they are flat so they stay put. Hooks are case hardened and buckles are shatter proof. These straps are available from 12 inch to 15 feet and from 95 to 200 lb breaking strength.
